Re: Leases for drilling Lake Lewisville, TX

Bureau of Land Management,

If you are properly managing our land, you could not be considering the leases you plan to issue for drilling on nearby Lake Lewisville. We are already in fear of a dam that will fail before it can be repaired. This has been a scandal in our local news media, and it seems impossible to imagine that the BLM would approve drilling in that same already sensitive lake area.

Please reconsider your plans.
